

HEET JOSHI

hjoshi6@wisc.edu | +1 (608) 395-5778 | <https://www.linkedin.com/in/heetjoshi/>

Software engineering student with strong backend and systems skills in Java, Python, and C. Experienced in building distributed backends, socket-based simulators, REST APIs, and full-stack dashboards. Skilled in networking, concurrency, and scalable infrastructure with additional exposure to Swift and iOS development.

EDUCATION

University of Wisconsin-Madison

Expected Graduation: May 2027

Bachelor of Science in Computer and Information Sciences

Relevant Coursework:

- | | | |
|-----------------------------------|-----------------------|--------------------------------|
| • Database Management | • Data Analysis | • Cloud Computing |
| • Object-Oriented Programming | • Distributed Systems | • Machine Learning |
| • Software Engineering Principles | • Web Development | • Data structure and algorithm |

SKILLS

Languages	: Java, Python, C, JavaScript (Node.js), SQL, C#, Swift
Backend & Infra	: REST APIs, Express.js, Flask, Docker, .NET, Entity Framework, Multithreading, Concurrency
Frontend & UI	: React.js, Responsive Design, Accessibility (WCAG/ARIA), UI/UX Principles, JavaFX, SwiftUI
DevOps & Tools	: Git, GitHub Actions, CI/CD, Linux, VSCode, Shell Scripting, Agile/Scrum, Unity
Networking Knowledge	: Socket Programming, Packet Handling, CRC, Uplink/Downlink Simulation
Monitoring & Testing	: Logging Pipelines, Debugging Tools, Unit Testing, Testable Mock Backends
Soft Skills	: Communication, Collaboration, Adaptability, Documentation, Research

PROJECTS

Telemetry Relay Simulator

- Built a socket-based Python relay system simulating ground-to-vehicle telemetry with retry logic, CRC validation, and fault tolerance.
- Implemented multithreaded logging and data streaming to replicate uplink/downlink channels for network debugging workflows.

Performance Insight Dashboard

- Built a Next.js + Node.js dashboard to visualize app metrics by device and date; added filterable views & API-connected graphs.
- Enabled fast iteration of network performance bottleneck analysis using dynamic filters and testable mock backends.

Task Prioritizer & API Engine

- Developed a backend system in Express.js and SQL for automated task scheduling with RESTful endpoints and retry middleware.
- Integrated a priority-based API router with simple state tracking—improving response handling across async workflows.

WORK EXPERIENCE

Ascendion

May 31, 2025- August 31, 2025

IT Intern

Ascendion Inc.

- Developed a scalable chatbot system using **Python, .NET, and SQL** with both frontend and backend integration.
- Automated key workflows and API connections to streamline **IT support processes and improve overall efficiency**.

University Housing

January 12, 2025-Present

House Fellow

University of Wisconsin-Madison

- Oversee a community of approximately 40–60 residents, promoting a supportive and inclusive living environment.
- Collaborate with a team of 8–10 staff members to develop, plan, and execute impactful community-building initiatives.

LEADERSHIP & INVOLVEMENT

Data Science Club

September 2024-Present

Member

University of Wisconsin-Madison

- Participated in data science workshops, collaborating with peers to explore topics like machine learning and big data analytics.
- Contributed to group discussions on tools like Python and Hadoop, enhancing problem-solving skills in data-driven contexts.
- Engaged in club activities to gain hands-on experience with data visualization and analytics techniques, improving practical skills.

Lead Workshop

September 2021-September 2021

Participant

[LEAAD organization](#)

- Enhanced leadership skills by participating in 10+ group activities and case studies over a week-long program.
- Improved group discussion dynamics and decision-making processes, leading to a 20% increase in team output and efficiency.
- Completed the program with a cohort of 30+ participants, focusing on effective communication and goal-setting strategies.
